Our Values

We are pioneers in the field of responsible share ownership with experience in shareholder engagement and governance stretching back to 1996.

Our core belief is, and has always been, that companies with actively involved share owners perform better over the long-term.

The topics upon which we engage are material to shareholder value and can be broadly characterised as strategy, financial structure and ESG (environmental, social and corporate governance factors). In our discussions with companies we seek to base our recommendations on thorough analysis and a pragmatic understanding of corporate issues.

We believe in a close alignment of interests with our clients: GO partners invest alongside clients in our funds.
