

Environmental Policy

GO Investment Partners LLP and our subsidiary Governance for Owners Japan KK are committed to minimising the impact of our activities on the environment, primarily through our engagement with listed companies in Japan. This commitment is endorsed by our parent company Board and actively supported by Senior Management and by all staff throughout our organisation.

Our activities include fund management via the TMAM-GO Japan Engagement Fund (the “Fund”), a Joint Venture with Tokio Marine Asset Management and consultancy services within our subsidiary. Tokio Marine Asset Management has published its own Sustainable Investing Statement, which includes all ESG aspects.

In all our activities we integrate ESG issues and believe that these should be addressed by Governance first. In order to achieve improvement in Environmental and Social matters, the Board and Management of companies must be willing to change and to implement identified necessary measures.

Our organisation has been a signatory of the UN Principles for Responsible Investment since 2006 and we have thus committed to The Principles:

- Principle 1: We will incorporate ESG issues into investment analysis and decision-making processes.
- Principle 2: We will be active owners and incorporate ESG issues into our ownership policies and practices.
- Principle 3: We will seek appropriate disclosure on ESG issues by the entities in which we invest.
- Principle 4: We will promote acceptance and implementation of the Principles within the investment industry.
- Principle 5: We will work together to enhance our effectiveness in implementing the Principles.
- Principle 6: We will each /year/ report on our activities and progress towards implementing the Principles.

Applying The Principles include acting on and engaging on Environmental issues, including Climate Change matters.

We do this by integrating ESG in all our activities, particularly investment activities, relating to the Fund and in all our consultancy services.

In February 2020 we became a Supporter of the Task Force on Climate-Related Financial Disclosures (TCFD). We are encouraging the portfolio companies in our Fund to become members.

We work by setting improvement targets for all our portfolio companies in the Fund and applying similar targets / milestones for our service Clients. These targets are then followed up on continuously.

At an internal level we will seek to minimise our impact on the Environment. This includes, for example, compensating for CO2 emissions for our air travel. We calculate tons of CO2 for all our air travel and make a compensatory payment annually.

Our Senior Management has ensured that all our staff has received are aware of and signed off on this Environmental Policy. Internally, it is available digitally in our systems. Externally, we have supplied existing and, when applicable, prospective Clients with the Policy.

Senior Management will report annually to the Board on progress made and following this, the Board will review the Environmental Policy, which then will be updated when so required.

GO Investment Partners LLP
Adopted by the Board on 10 August 2021
